Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 6-7, drawn to a first metal air cell, classified in class 429, subclass 27.
 - II. Claims 8-9, drawn to a second metal air cell, classified in class 429, subclass 72.
2. The inventions are distinct, each from the other because of the following reasons: each of these two groups include materially different structures that patentably distinguish the two different groups of invention. For example, Group I includes a tube that contacts the anode on one end and contacts the electrolyte at the other end. The Group II claims do not include such a structure. In addition, the Group II claims include a frame including a plurality of apertures therein, which element does not find part of the Group I claimed invention.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to John S. Maples whose telephone number is 571-272-1287. The examiner can normally be reached on Monday-Thursday, 6:15-3:45, every other Friday.
